CHAPTER 4

THE TEAM PLANS OUT THEIR NEXT MISSION TO DO SOME RECON ON WHAT EXACTLY THE GOLIATH IS. BUT JOE WONDERS WHAT HIS FULL POTENTIAL IS AND IF HE'S READY TO SEE MORE OF WHO HE USED TO BE...

Ready?
As we'll ever be.
While I was being interrogated by one of Terraces top scientists,
we were able to ascertain more information about the Goliath.

It is a city-leveling weapon built for destruction on a mass scale.

Which pretty much confirms our intel.

But as far as where is unknown.

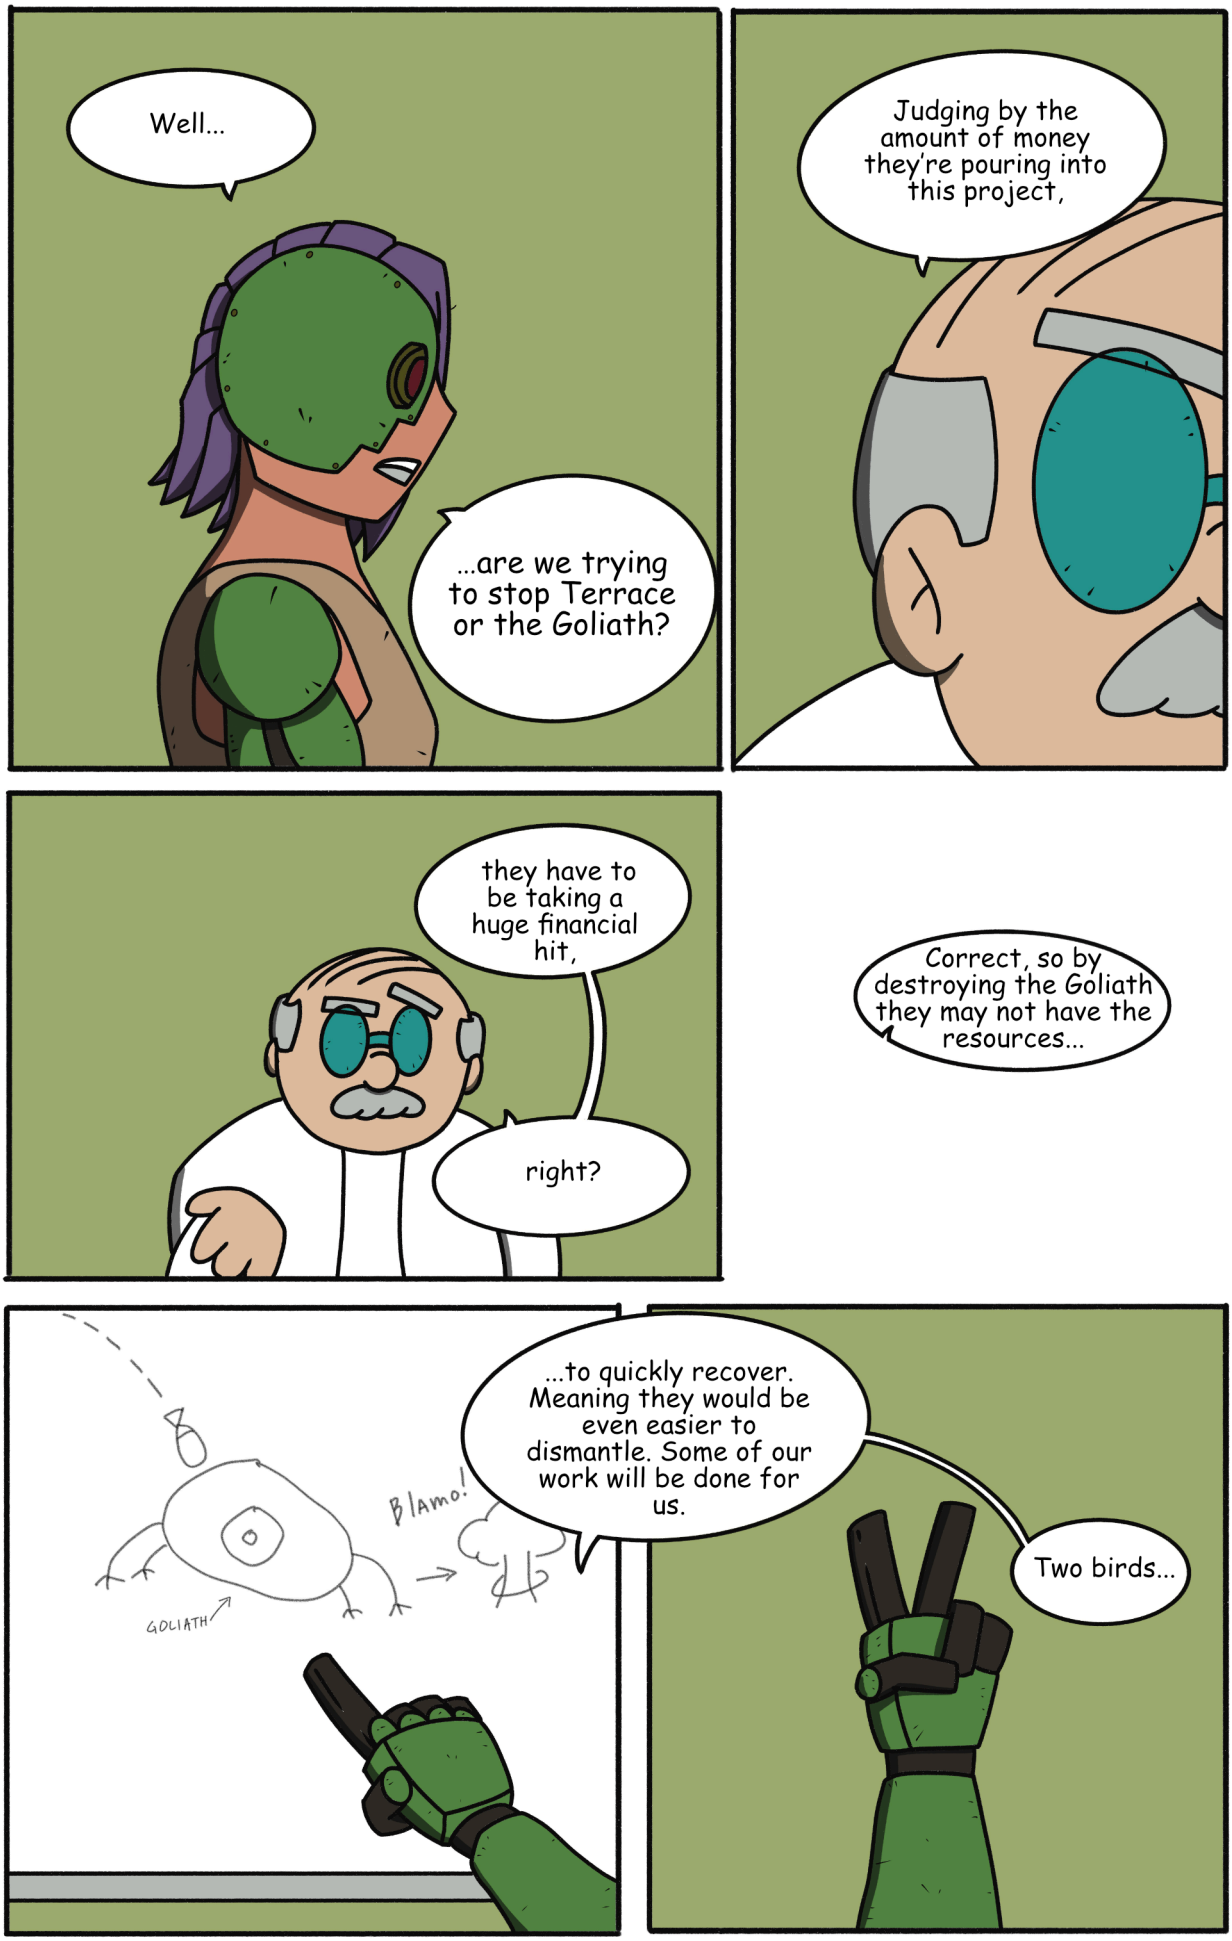

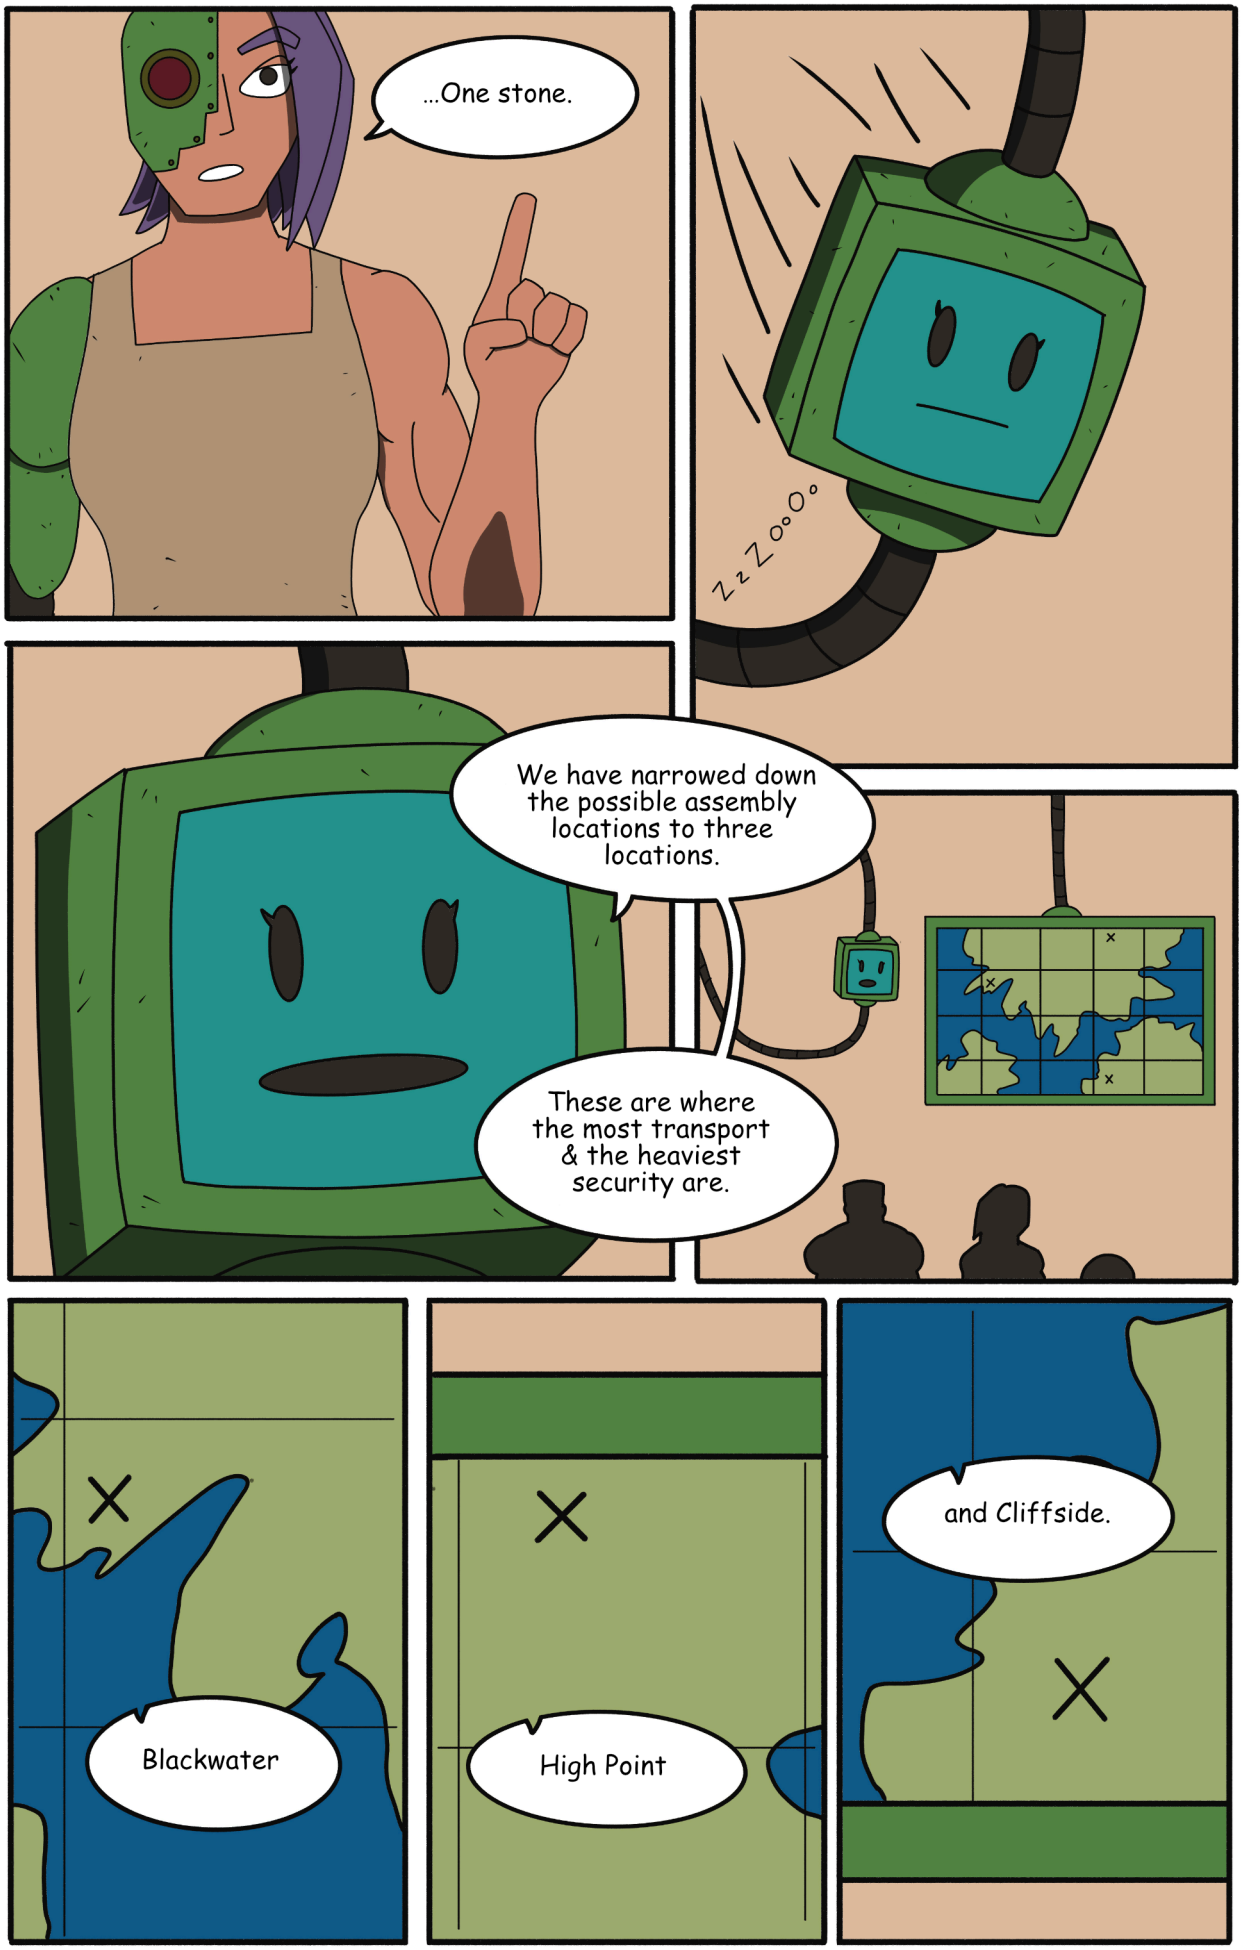

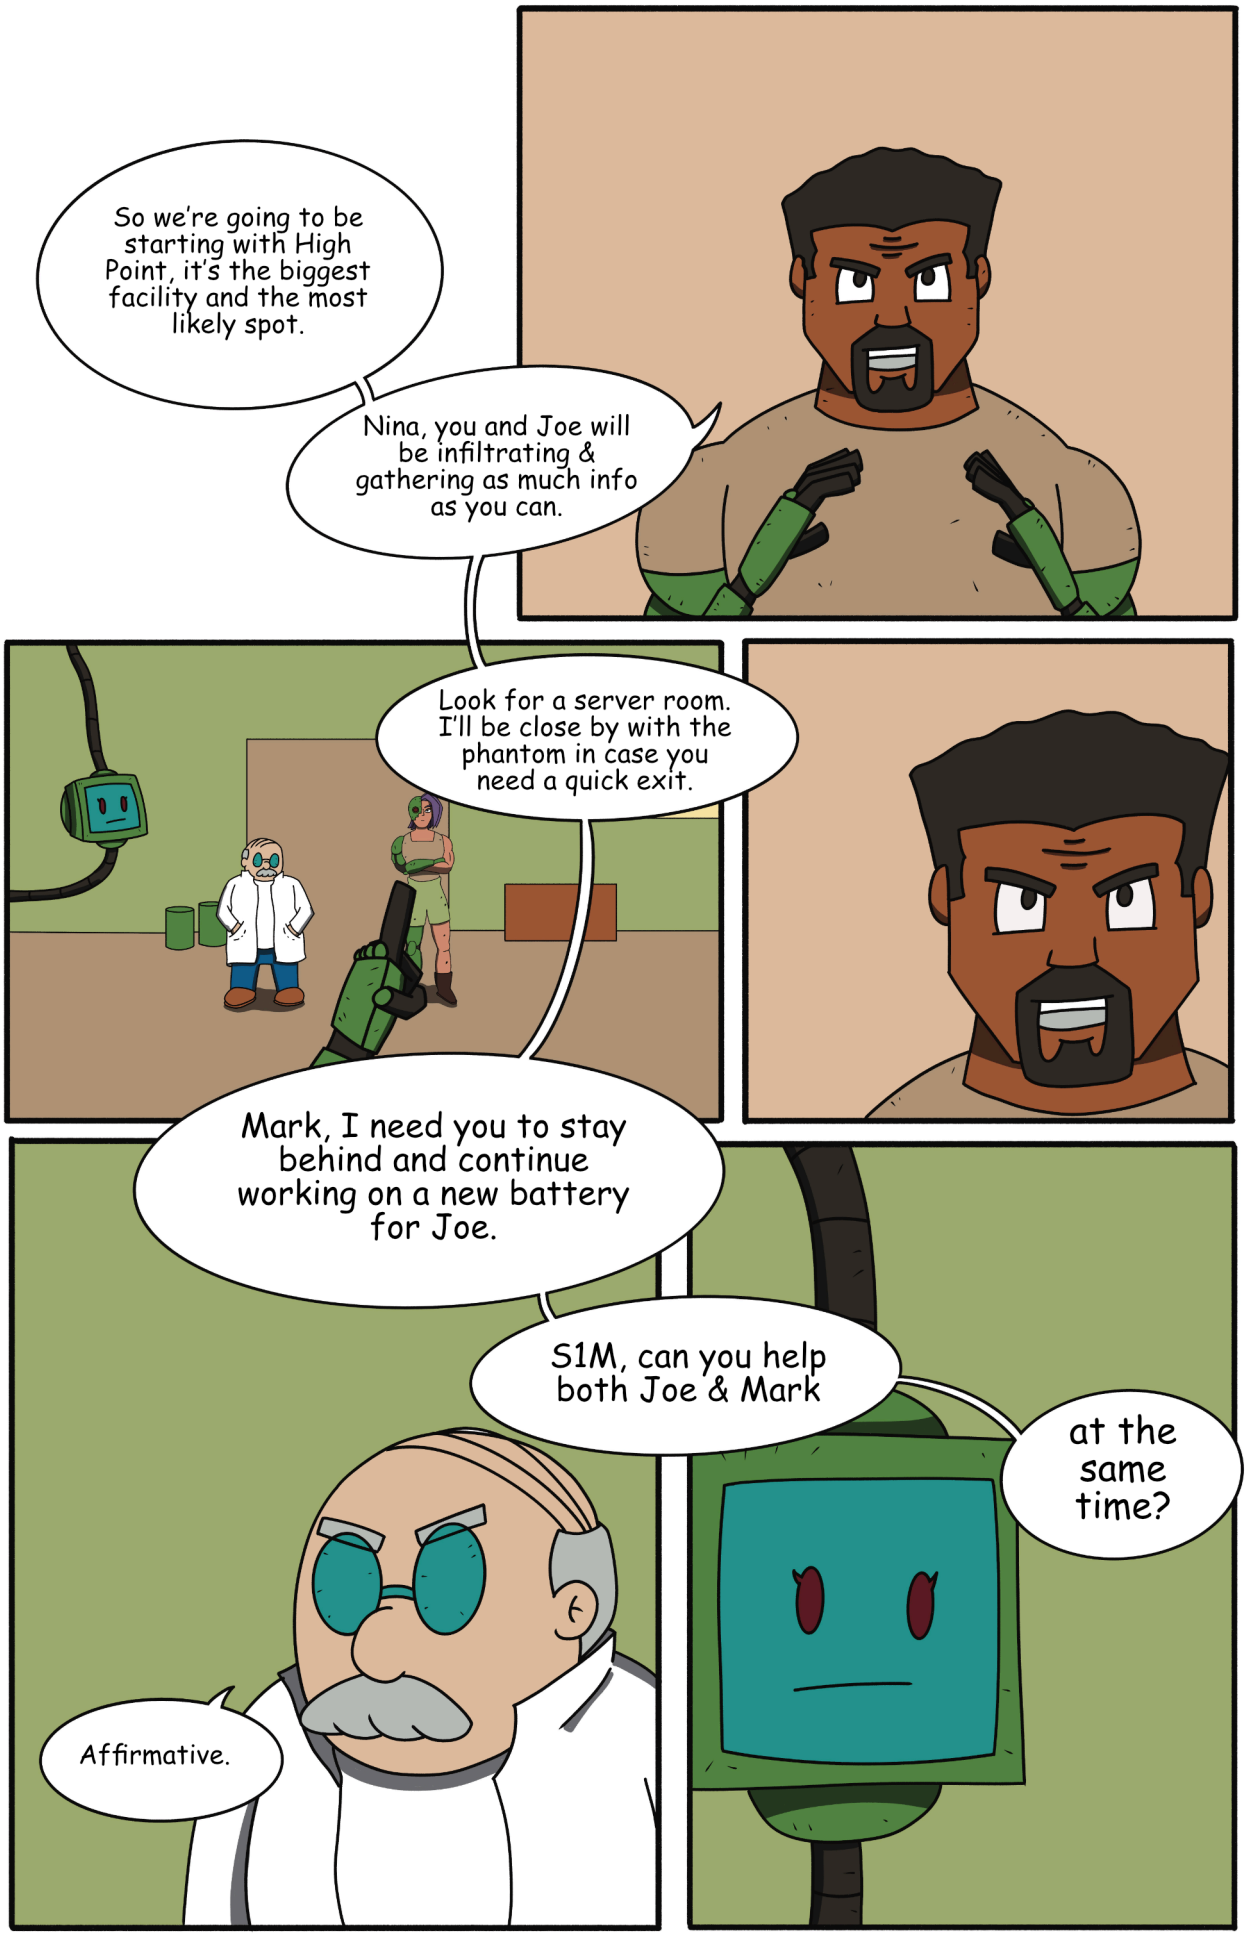

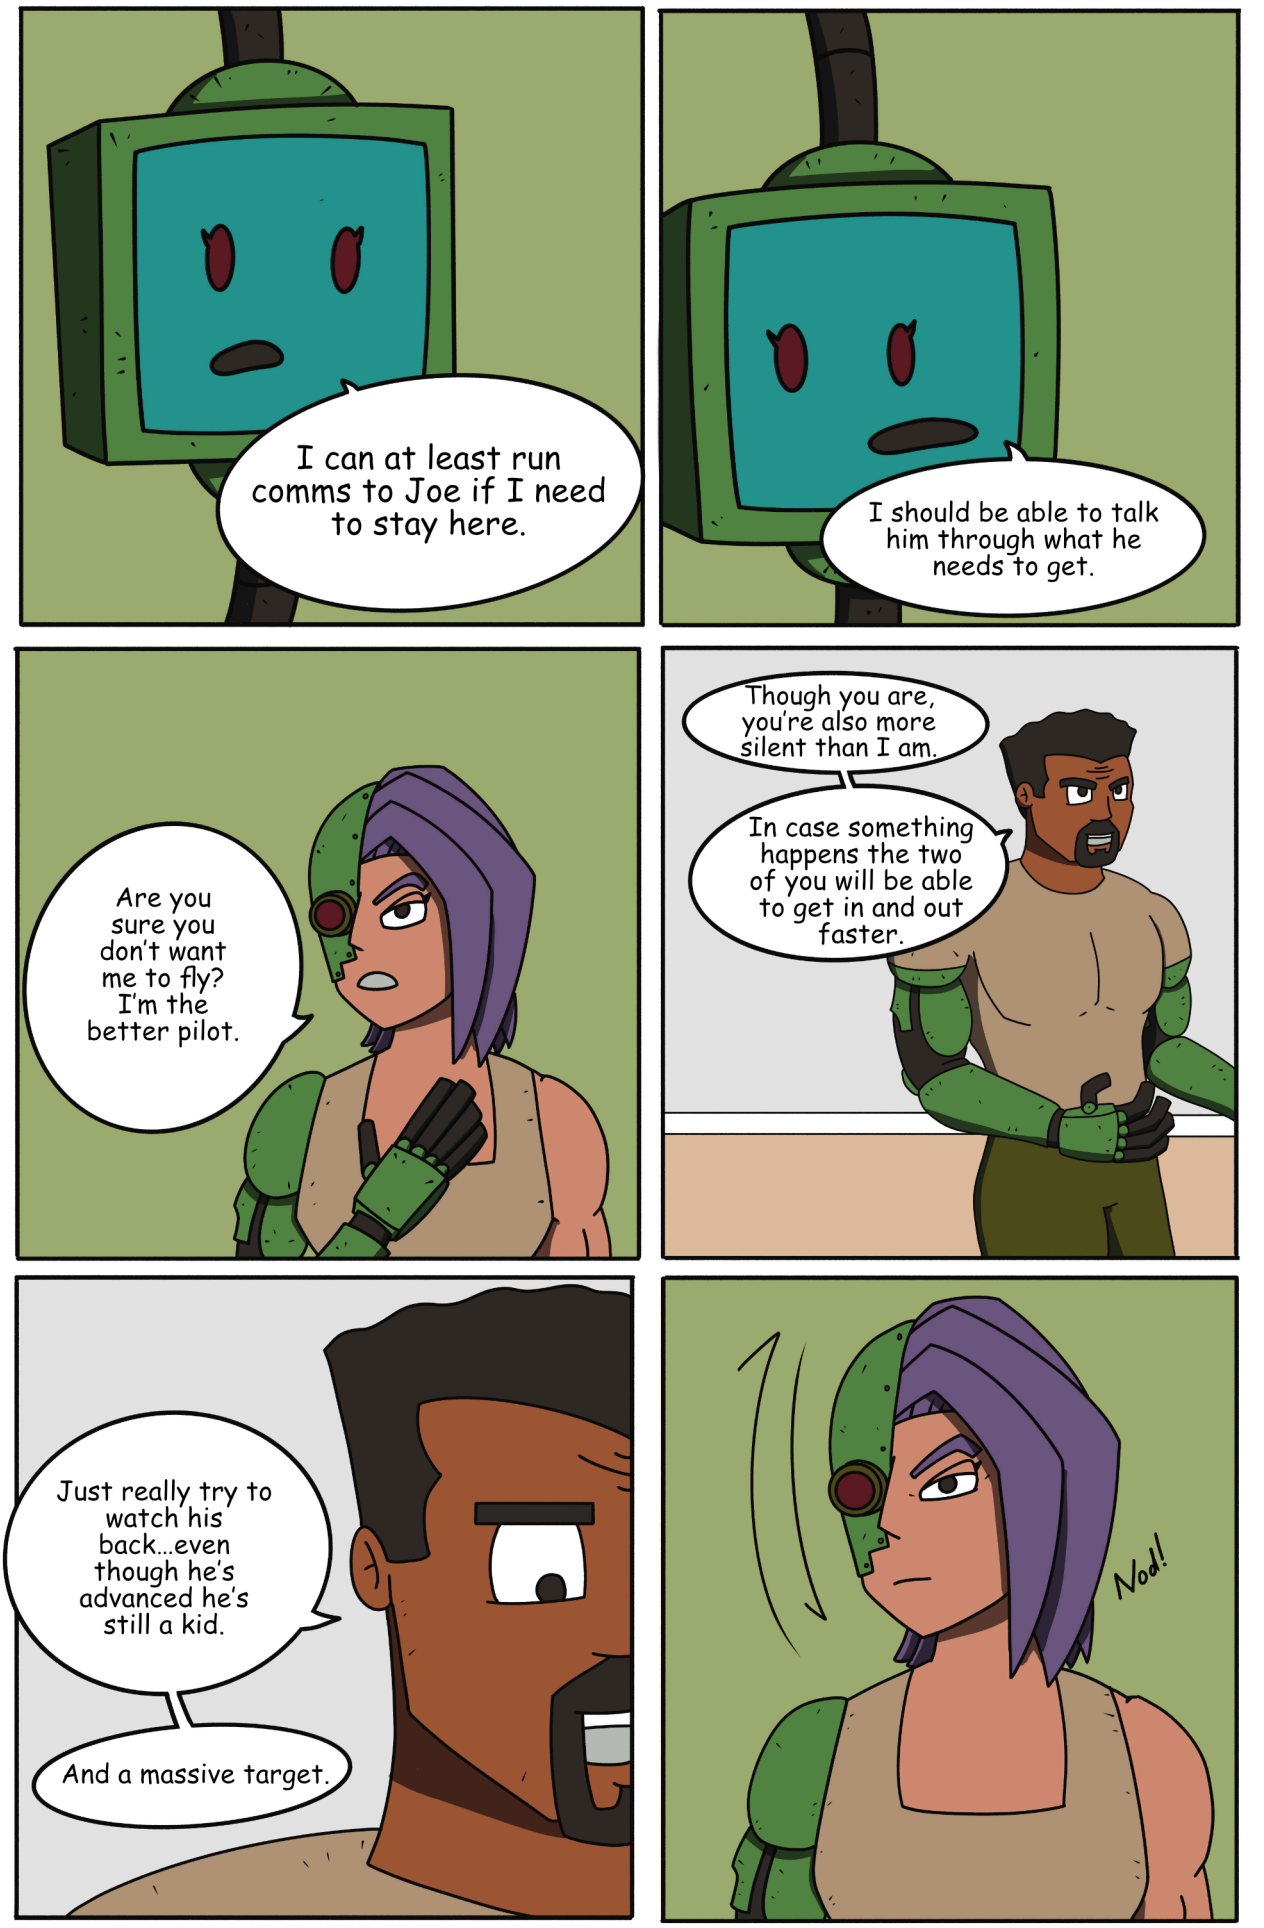

A weapon of that size won't be manufactured in one place...

but it's possible to be assembled in one place.

Well...
...are we trying to stop Terrace or the Goliath?
Judging by the amount of money they're pouring into this project,
they have to be taking a huge financial hit,
right?
Correct, so by destroying the Goliath they may not have the resources...
...to quickly recover. Meaning they would be even easier to dismantle. Some of our work will be done for us.
Two birds...
BIAmo!
GOLIATH

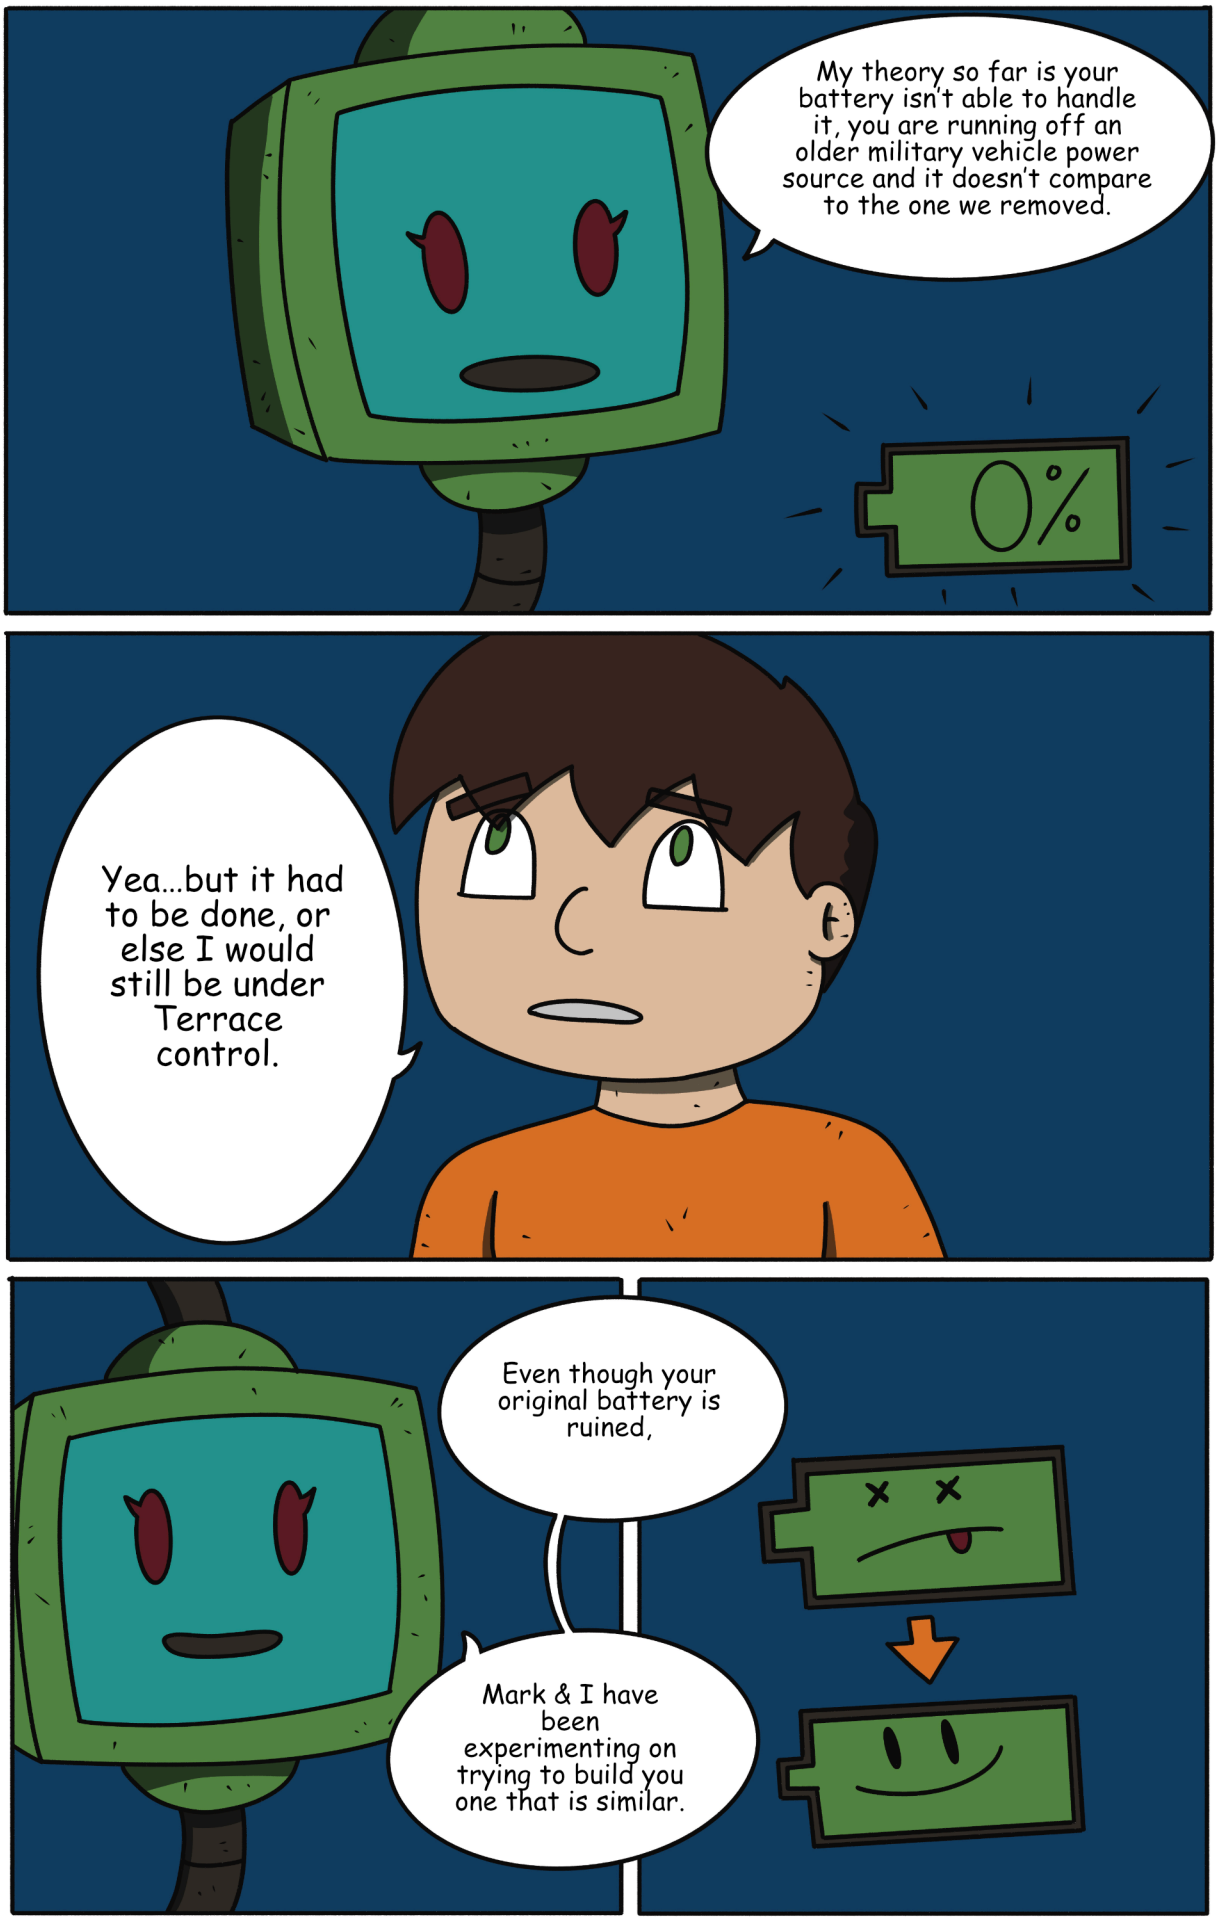

...One stone.
ZzZoOo
We have narrowed down the possible assembly locations to three locations.
These are where the most transport & the heaviest security are.
Blackwater
High Point
and Cliffside.

So we're going to be starting with High Point, it's the biggest facility and the most likely spot.
Nina, you and Joe will be infiltrating & gathering as much info as you can.
Look for a server room. I'll be close by with the phantom in case you need a quick exit.
Mark, I need you to stay behind and continue working on a new battery for Joe.
S1M, can you help both Joe & Mark
at the same time?
Affirmative.

I can at least run comms to Joe if I need to stay here.
I should be able to talk him through what he needs to get.
Are you sure you don't want me to fly? I'm the better pilot.
Though you are, you're also more silent than I am.
In case something happens the two of you will be able to get in and out faster.
Just really try to watch his back...even though he's advanced he's still a kid.
And a massive target.
Nod!

So like...what weapons do I have access to?
Access? Your blade,
you know this, Joe.

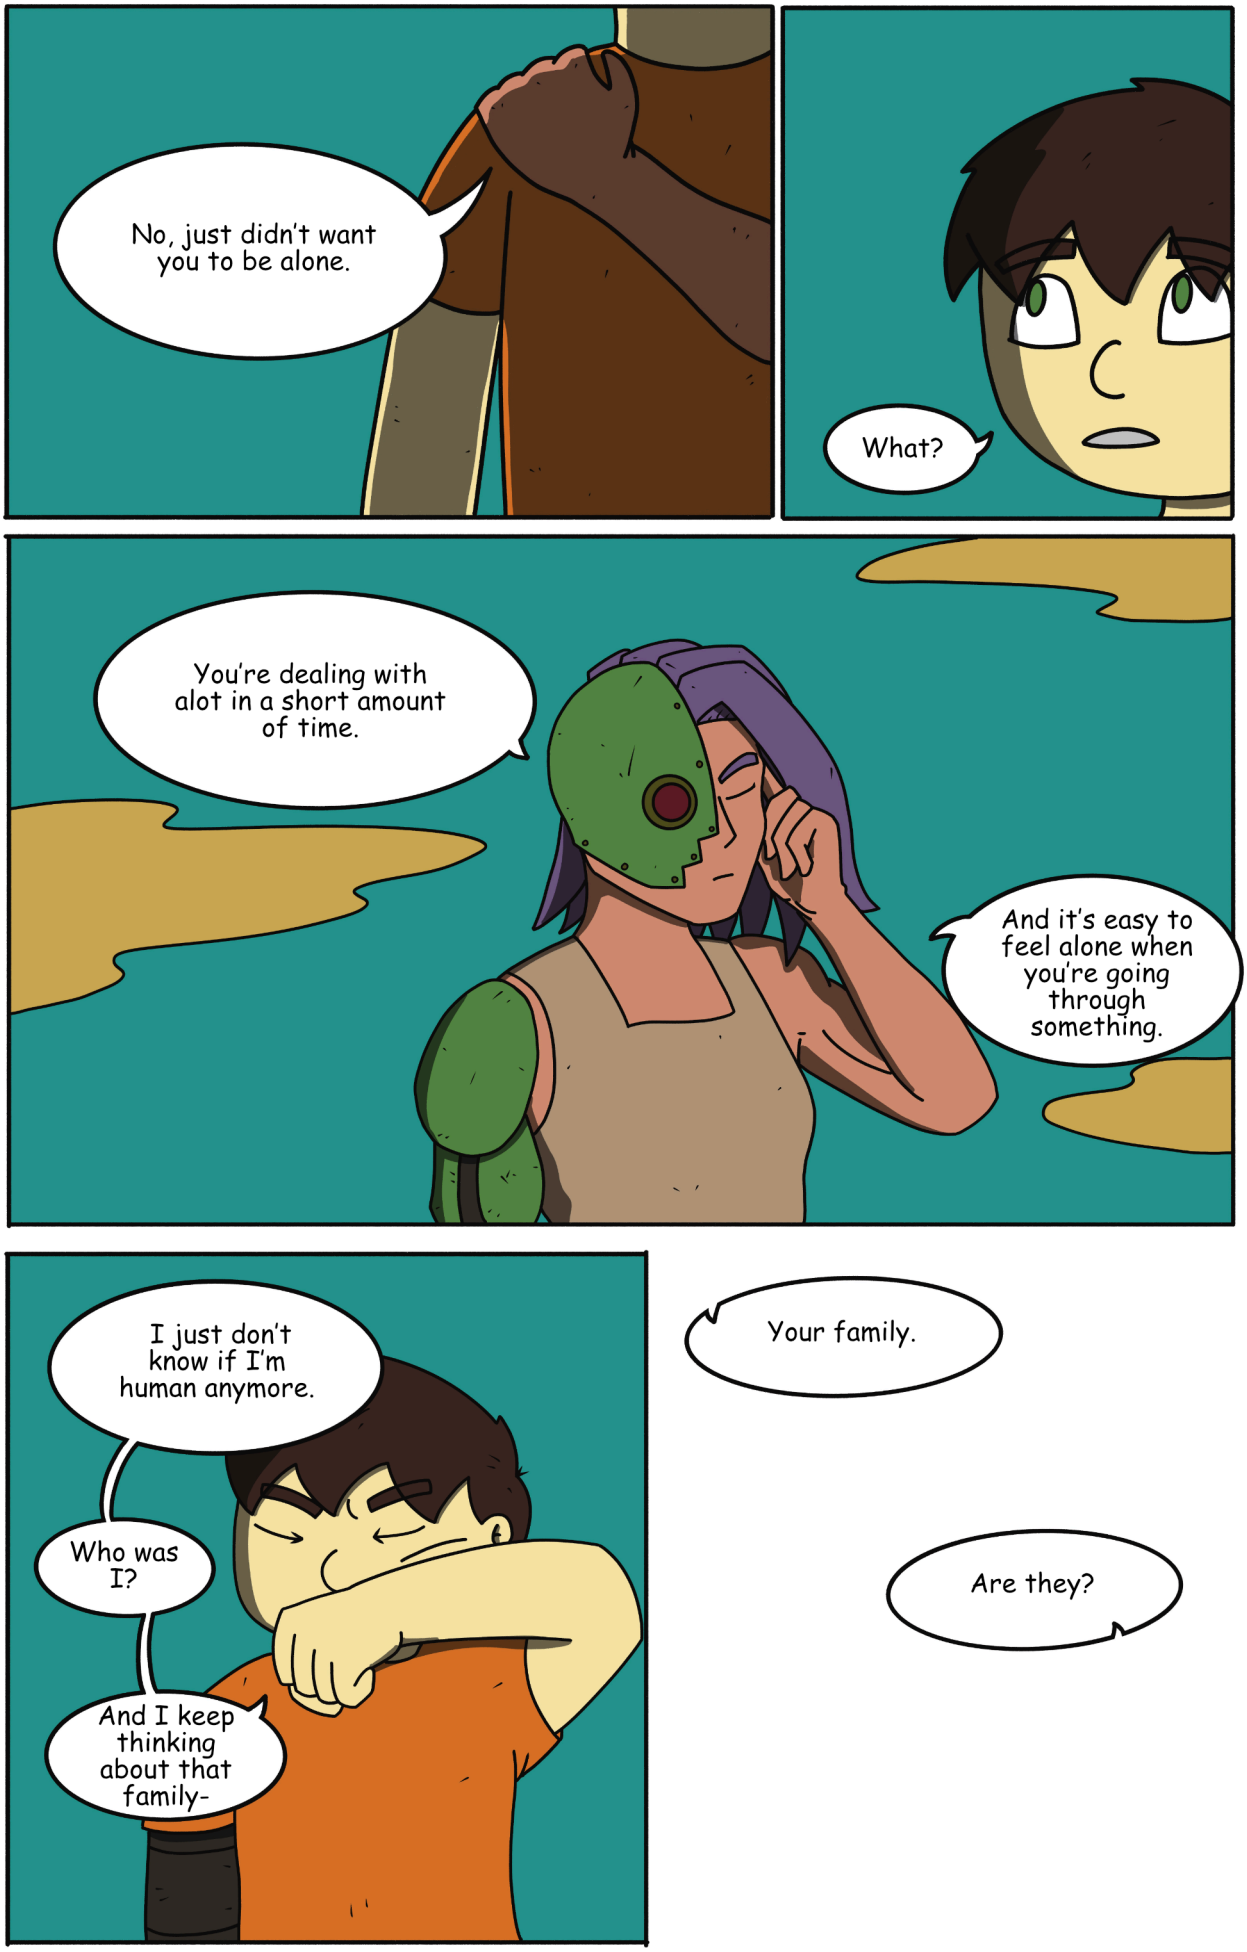

No, I meant what's all in here?
Judging by what we know about the previous Necro Experiments you should have at least...
...a grappling hook and a blaster, but I see a lot of options that are available.
A GUN?!
Whoa, that would be *sick* to have!

My theory so far is your battery isn't able to handle it, you are running off an older military vehicle power source and it doesn't compare to the one we removed.
0%
Yea...but it had to be done, or else I would still be under Terrace control.
Even though your original battery is ruined,
Mark & I have been experimenting on trying to build you one that is similar.

And?
We have been unsuccessful so far, we are working with limited resources
...I have an idea!

What did SIM find?
Nothing new.
I guess we'll have to wait and see.
Nina, did you need something?

No, just didn't want you to be alone.
What?
You're dealing with alot in a short amount of time.
And it's easy to feel alone when you're going through something.
I just don't know if I'm human anymore.
Who was I?
And I keep thinking about that family-
Your family.
Are they?

Yes they are. That doesn't change just because you don't remember them.
Do you...
...want to remember them?
I don't know...
...if I saw them, would I even recognize them?
Would they recognize me?
For sure they would.
Would I even want to recognize them?
I think the kid you are inside would want to.
Do you think Dom would be mad...
...if I looked for them?
I think Dom wants you to do whatever will bring *you* peace.

After all...
...that's what we're all trying to do.
